

# HADIADDEV

## Welcome to my Resume App

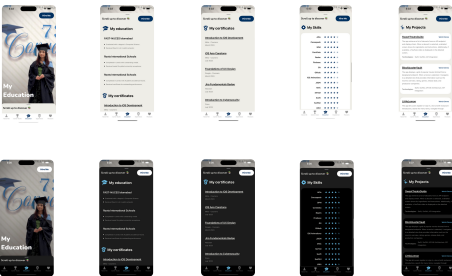

### About the Project

I have developed a resume app designed to present information typically shared with recruiters via a PDF resume, but in an app format. The app comprises five sections: personal details, career goals, education, work experience, and passions.

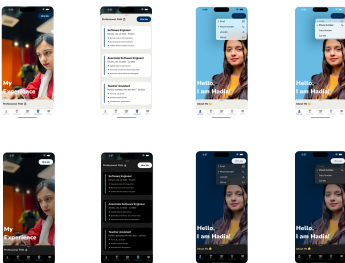

### About Me & Career Goals

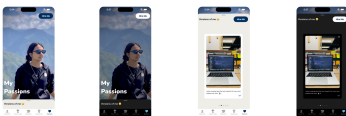

### My Education

### My Experience & Contact Me

### My Passions

### Tools & Technologies

SwiftUI

UIKit

AVKit

XCode

Swift
